The FBI is seeking information about an unidentified bank robber who has robbed at least seven banks in six states since December 28, 2018. Investigators have dubbed him the "Traveling Bandit" based on the great distances he has covered committing these robberies. They believe the robber may strike again in the near future given his pattern of past robberies, as displayed below.

So far, no one has been injured during the robberies. The suspect usually approaches the counter and presents a note demanding money and threatening a weapon, then departing the bank on foot. He may be driving a white Ford Explorer or Expedition. (See above photo.)

In most of the robberies, he has worn similar clothing, including a black jacket, white t-shirt, and black baseball hat. He is described as a white male, with a goatee, and salt and pepper hair. He is approximately 40 to 50 years old, 5'6" to 5'10", with a medium build. The suspect has tattoos on both arms.

The FBI and numerous local and state law enforcement agencies continue their investigation.
